

Build your own steps and stairs!

Pa-So offers stringer hangers in high quality Swedish steel from SSAB. The entire product is manufactured in southern Dalarna.

Build your own stairs without any previous experience. Steps and stairs for pros and DIYers.

Quick and easy. All you need to know is how to use a saw, and how to measure. All the necessary angles are included in the product.

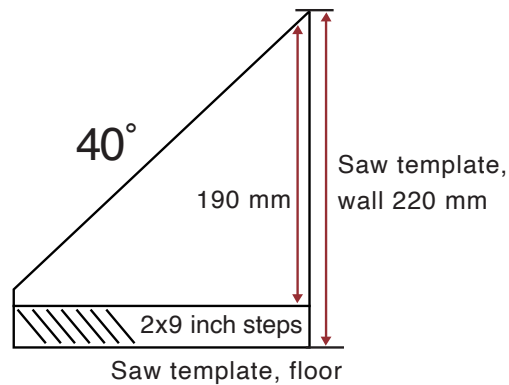

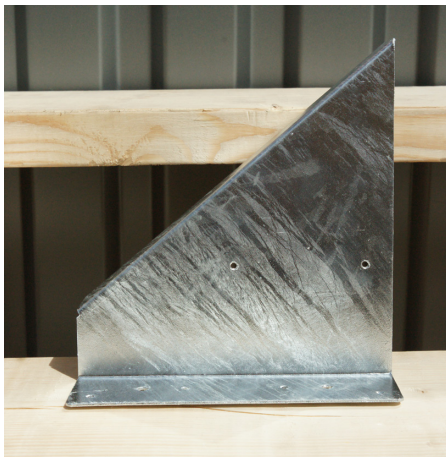

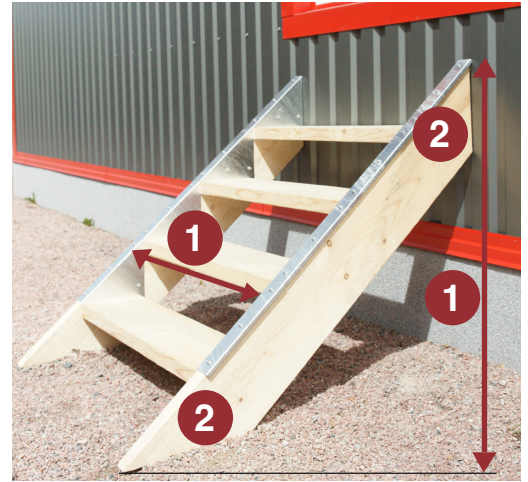

Flip the sheet to find out more >>>

Build your own steps and stairs – it couldn't be easier!

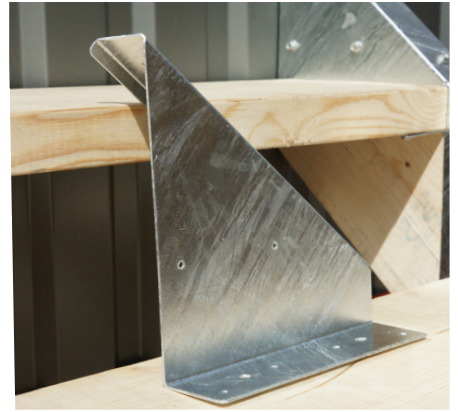

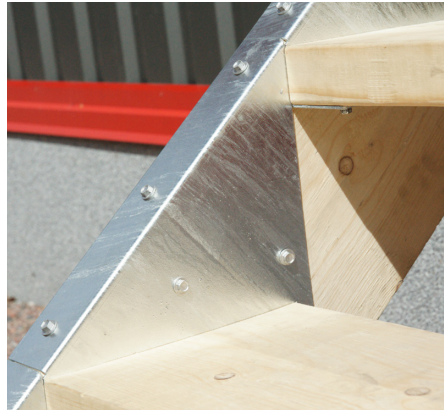

1. Measure how high and wide you want the steps to be.
2. Cut the stringer angles for the floor and wall. And steps to the desired width.

Then just assemble the steps using 6x40 mm screws.
Good luck with your Swedish-made stairs!

Remember!

You will need both left and right side stringer hangers.

Pa-So Stringer hangers, part no. 63

Max step width	1500 mm

Installation

Measure the height of the stairs.
Divide by the individual step height.
Step height = 190 mm.

Example:

Height of stairs = 1500 mm, $1500 = 7.89$ steps

Remove the bottom step = 1 step
Number of steps = $7.89 - 1 = 6$ steps
Screw the steps into the stringers
